Introduction

This is an R Markdown presentation. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document.

This R Markdown and Beamer template is created by **Christine P. Chai** (cpchai21@gmail.com). She started with the existing template of the R Markdown presentation, and she incorporated some commonly-used LaTeX functions in this version.

If the compilation in **Knit** does not succeed (resulting a corrupted PDF file), then we need to go into “MikTeX Console → Settings” and select “Always install missing packages on-the-fly”. Then RStudio can automatically install the required LaTeX packages.

Section 1

- Bullet 1
- Bullet 2
- Bullet 3

“All models are wrong, but some are useful.”

– George Box, Statistician

Content with Two Columns

First column

Write something here

Write more

Closing sentence

Second column

Use `itemize` in LaTeX.

- Item 1
- Item 2
- Item 3

Different Font Sizes

- tiny
- scriptsize
- footnotesize
- small
- normalsize (default)
- large
- Large
- LARGE
- huge
- Huge

Section 2

```
summary(cars)
```

##	speed	dist
##	Min. : 4.0	Min. : 2.00
##	1st Qu.:12.0	1st Qu.: 26.00
##	Median :15.0	Median : 36.00
##	Mean :15.4	Mean : 42.98
##	3rd Qu.:19.0	3rd Qu.: 56.00
##	Max. :25.0	Max. :120.00

Slide with Plot – Original

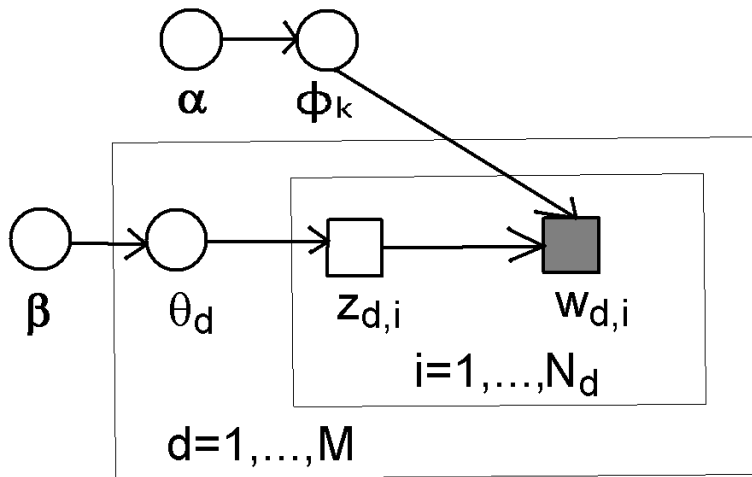

Slide with Plot – Larger Text

R package: ggplot2

```
scale_color_manual(values=c("red", "darkgreen", "black"))  
scale_linetype_manual(values=c("dashed", "solid", "dotted"))  
scale_shape_manual(values=c("square", "circle", "triangle"))
```
